

PARTNERSHIPS FOR MULTILAYER COATING PAINT PROTECTION FILMS

Carestream partners leverage our multilayer coating, product development and manufacturing expertise to bring a variety of products to the paint protection market including permanent and temporary paint protection applications.

As a leading innovator in simultaneous, precision multilayer coating technology and manufacturing, we utilize our relationships with substrate and chemical supplier partners to develop precision-coated paint protection film structures. We employ advanced materials and constructions, backed by clean room operations, on-line quality inspection methods and extensive analytical testing, to deliver significant process development advantages. Coating assets also feature optional tandem coating stations for high efficiency, long ovens and lamination.

Paint Protection Coating Capabilities:

- Mixing
- Water and solvent based systems
- In-line mixing of reactive systems
- Precision coating
- Multiple layers
- Long dryer / ovens
- UV cure
- Lamination
- Clean room

Process Development Advantages:

- Experience with a wide variety of substrate and coating materials
- Relationships with substrate / chemical suppliers

Custom Paint Protection Product Expertise:

- Permanent and temporary paint protection
- Topcoats and multiple layer constructions

ABOUT CARESTREAM

Precision Multilayer Coating Partnerships

Building on more than 100 years of precision multilayer coating leadership, Carestream applies aqueous and solvent coating proficiency at bench, pilot and production-scale manufacturing for optimal product design, technology integration and manufacturability. Partners leverage Carestream's coating expertise, manufacturing assets and new product commercialization processes to develop precision-coated and cast film applications for a wide range of energy storage, display, medical, optical, electronic and other advanced materials products. Carestream actively seeks growth partnerships, which combine customer product IP and market channels with its high-speed roll-to-roll processing, quality systems and worldwide presence to bring new products through commercialization quickly and efficiently.

For more information, contact 541.831.7374 or info@tollcoating.com to learn how a Carestream partnership can bring high yield and cost advantages to your paint protection products.
